True to your vision®

HD PRINTS with
unparalleled quality
for photos and artwork.

2018 - 2019

ChromaLuxe®

True to your vision®

ChromaLuxe is the world's leading manufacturer of high definition sublimatable print media. Through dye sublimation, images are infused directly into our specially coated sheets of metal, wood and table top panels to create the most vibrant, durable, and longest lasting photo medium in the world.

Available in a wide variety of shapes, sizes and finishes, ChromaLuxe turns any image into a focal point for homes, businesses and commercial spaces.

Welcome to the world of ChromaLuxe, the medium of choice for high definition sublimation printing.

It's with great pleasure that we can present you our new ChromaLuxe catalogue.

Our team worked hard to improve existing products and developing new products for you. Compared to last year's catalogue you will find more than 100 new products.

We are committed to giving you the resources, tools and support to further grow your sublimation business. We continue to make significant investments in equipment and research to improve our coatings and develop new products. Our goal: to provide you the best quality sublimation products made anywhere in the world. We appreciate the confidence you have in our products and work hard to deserve this trust you put in us. Quality, variety and value are key factors in our daily work.

In order to give you the best service possible, we have launched **www.starttosublimite.com**: a technical portal providing you with how-to-videos, answers to frequently asked questions, setup information for printer and press, production tips & tricks and much more. Make sure to discover it, and register for free.

We also released a number of new ChromaLuxe® products and continue to expand our line of photo products. Our ChromaLuxe EXT product line will enable you opening many new markets (see pages 18&19).

We are dedicated to helping you at what you do best: bringing our best quality to your market.

All of the sublimatable products in this catalogue are coated in an environmentally friendly manner in our ISO certified facility in Louisville, Kentucky, U.S.A.

In 2017 we opened a warehouse in Jebel Ali Free zone where we stock over 200 fast moving items and from where we supply all our distribution partners and customers in the Middle-East region and Africa.

Our products are now sold in over 90 countries worldwide. We have a global support team on 4 continents to help serve customer needs around the world. Wherever you are, we have distribution partners to support you.

The opportunities for your business to grow with sublimation are countless, and we are excited and thankful to be a part of your growth. On behalf of our entire UW team, we are looking forward to another great year together.

ChromaLuxe HD Metal Prints with guaranteed 64-year print permanence.

ChromaLuxe Achieves Three Times the Print Display Permanence Rating Compared to Silver-Halide Color Papers.

Latest generation ChromaLuxe aluminum sublimation photo panels printed with Epson UltraChrome DS and Sawgrass Photo XF inks achieve Wilhelm Imaging Research, Inc. (WIR) Display Permanence Ratings that are more than three times better than current silver-halide photo papers.

ChromaLuxe announced a major advancement in photographic printing technology, color brilliance, d-max, print longevity, and surface physical durability with a WIR Display Permanence Rating of 65 years for its ChromaLuxe aluminum sublimation photo panels when printed with Epson UltraChrome DS inks, and 64 years when printed with Sawgrass Subli-jet-HD Pro Photo XF inks.

Widely recognized as the world's leading independent print permanence testing laboratory, WIR conducted comprehensive, multi-factor print permanence tests on ChromaLuxe. Although the 4-color Epson and 8-color Sawgrass inks have different dye formulations, and distinctly different individual ink fade patterns, both brands of inks proved to be well matched to the latest ChromaLuxe sublimation coating formulations, and both have achieved almost identical

WIR Display Permanence Ratings.

With unprecedented resistance to surface abrasion, high humidity, atmospheric ozone, and contact with water, ChromaLuxe prints, available in sizes up to 1.25m x 2.5m, can be safely displayed without the need for framing under glass or acrylic, face-mounting, or surface laminating. When displayed, unframed prints made with the latest generation of ChromaLuxe aluminum photo panels are far more stable and longer lasting than Kodak Endura or other current silver-halide papers, including silver-halide prints framed under UV-absorbing acrylic or glass or when face-mounted to UV-absorbing acrylic.

“We are committed to providing the most advanced photographic sublimation print media for the most demanding photographers”

“From the beginning, ChromaLuxe has committed substantial resources to research and development for our sublimation photo panels with the goal of constantly improving the image quality and permanence, d-max, and printing consistency. We are committed to providing the most advanced photographic sublima-

tion print media for the most demanding photographers,” said Cheryl Bennet, Director of Marketing. “Working with leading sublimation ink suppliers and other industry partners, genuine ChromaLuxe prints now offer photographers an unmatched combination of display permanence, physical surface durability, and color brilliance.”

According to Henry Wilhelm, Director of Research at WIR, “Very complex interactions take place between sublimation inks and the ink receptive polymer coatings of dye sublimation prints, both during the short, high-heat image transfer step involved in making the prints and, very gradually over time, during the long-term display and storage of the prints. What a print looks like when it emerges from the heat press tells you nothing at all about how long it will last. You can consider permanence – or the lack thereof – to be the invisible factor in sublimation printing.”

“In terms of how long your prints will last, sublimation on metal photo panels is a new and rapidly advancing technology, and all aluminum photo panels – frequently referred to in the marketplace simply as ‘Metal Prints’ – are by no means the same,” Wilhelm said. “If your lab is using untested products, both you and your customers are flying blind.”

SUBLIMATION

SCIENCE ON HARD SURFACES

You may have learned in chemistry that sublimation involves a substance that changes from a solid to a gas without ever becoming a liquid. In the hard surface sublimation industry, an image is printed onto transfer paper using dye-based inks and then transferred onto a specially-coated surface with heat and pressure. We manufacture blank products, and you subliminate. If you've never heard of sublimation, here's something you may not know. Getting started sublimating on your own is easy! All you need is a computer, a printer with sublimation inks, transfer paper, a heat press and your Unisub or ChromaLuxe products.

WHAT CAN I DO WITH SUBLIMATED PRODUCTS?

The market for hard surface sublimation is expanding daily. There are numerous opportunities to grow and expand your business into new markets, such as personalized gifts, customized business products, schools, sports, professional photography, fine art markets and more. And that's just a sneak preview! Flip through our catalog for more details, tips and tricks about these market opportunities.

WHAT TO DO TO GROW YOUR SUBLIMATION BUSINESS TODAY?

Contact an official distributor to get everything you need to start and grow your sublimation business today.

Find our distributors here:
<http://www.chromaluxe.eu/find.html>

3 SIMPLE STEPS TO SUBLIMATE

1

Choose any picture, illustration or other graphic image. Sublimation is great for any color combination from black and white to full color.

2

Insert the special sublimation ink cartridges into your printer. Print the image onto sublimation transfer paper designed for hard surface products. Tape the transfer paper to your product.

3

Position your product on the heat press face up and apply pressure for the appropriate amount of time. Remove the transfer paper from the surface. Enjoy the wow!

SUBSTRATES

Universal Woods coats a variety of hard substrates including aluminum, MDF, hardboard, natural wood and phenolic. As an ISO 9001:2008 certified manufacturer, each of our products is manufactured and inspected to ensure the highest quality of sublimatable products in the industry.

ALUMINUM

ChromaLuxe metal prints in a variety of shapes and sizes, creative borders and murals.

Finish: Gloss White, Semi-Gloss White, Matte White, Gloss Clear, Semi-Gloss Clear, Matte Clear

Thickness: 1,14 mm / 0.045"

MEDIUM DENSITY FIBERBOARD (MDF)

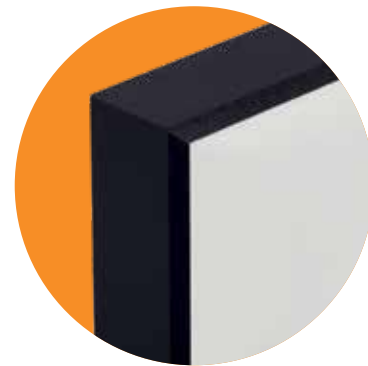

ChromaLuxe MDF board is available in two finishes – Gloss White and Semi-Gloss White. MDF can be used for photo panels or signage with a finished black edge.

Material: MDF Finish: Gloss White

Thickness: 15,8 mm / 0.625" and 12,7 mm / 0.5"

Material: MR-MDF Finish: Gloss White, Semi-Gloss White

Thickness: 19 mm / 0.75"

HARDBOARD

ChromaLuxe hardboard products are available as one or two-sided. Hardboard can be used for ChromaLuxe creative border photo panels or hinged and easel-back photo panels and more!

Material: Hardboard Finish: Gloss White, Matte White

Thickness: 6,35 mm / 0.25"

NATURAL WOOD

ChromaLuxe natural wood panels are comprised of a low gloss coating on MDF core with maple veneer face and back.

Material: MDF Maple Veneer Finish: Matte Clear

Thickness: 15,9 mm / 0.625"

PHENOLIC

Phenolic is a thin, impact resistant composite material. Phenolic can be applied to other materials to fill a need for those looking to cover large areas with a smooth faced, durable, imaged substrate.

Finish: Gloss White, Matte White

Thickness: 1,27 mm / 0.05"

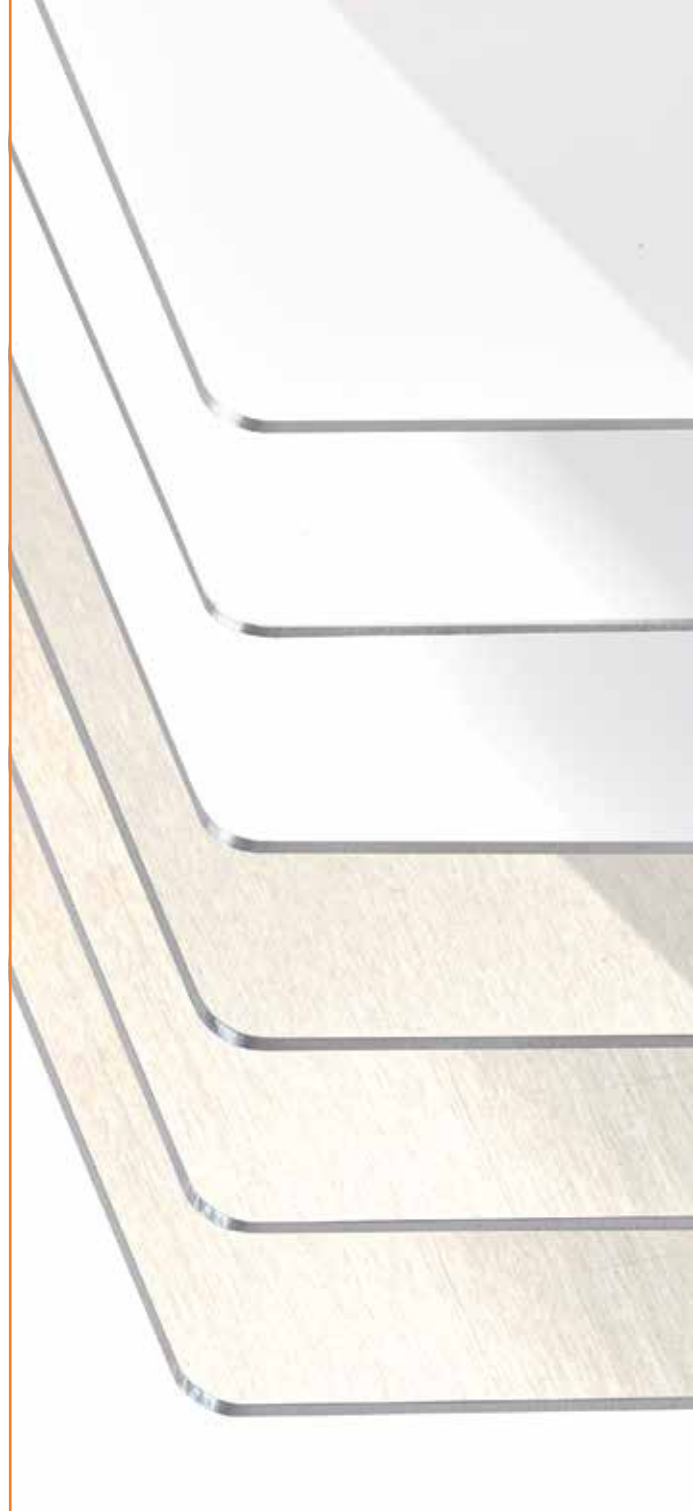

STEEL

ChromaLuxe steel is available with a gloss finish and is perfect for message board and magnetic applications.

Finish: Gloss White

Thickness: 0,6 mm / 0.023"

HD METAL PRINTS (ALUMINUM)

Offer customers vivid image reproductions on stylish metal print shapes!

Material: Aluminum Thickness: 1,14 mm / 0.045"

CHROMALUXE EXT **NEW**

DOUBLE THE
OUTDOOR LIFE
OF YOUR
CHROMALUXE PRINT

ChromaLuxe EXT gives users the ability to take prints outdoors, or into direct sunlight with the image quality and durability they've come to expect from other ChromaLuxe products. These UV resistant panels come in a variety of common sizes to serve the signage, display and outdoor photography markets.

FEATURES AND BENEFITS:

- Image quality, depth and color
 - Consistent high gloss finish
 - Weathers well
 - Easy to clean
 - Graffiti resistant
 - Chemical resistant
- Scratch resistant
 - Impact resistant
 - Wind resistant
 - No need to laminate
 - Thoroughly tested

Material: AL Thickness: 1,14 mm / 0.045"

CREATIVE BORDER DESKTOP PHOTO PANEL WITH DUAL KEYHOLE & KICKSTAND

ChromaLuxe Creative Border Photo Panels with keyholes and kickstand are an excellent choice for those wanting to showcase their photo art as either a desktop item or wall display. Each panel comes with four dual-use keyholes capable of holding a kickstand for desktop use or nail for wall display. Keyholes are located on all four sides on the back of each panel for either landscape or portrait display. Panels have a black back and edge and come with a black kickstand.

Material: Hardboard **Finish:** Gloss White **Thickness:** 6,35 mm / 0.25"

TIME CALCULATION FOR SUBLIMATION*

HOW TO CALCULATE THE CORRECT TIME :

To calculate the time: multiply height by width and choose the time that is closest to your result.

Example:

$20 \times 30 \text{ cm}^2 = 600 \text{ cm}^2 \ggg 3:02 \text{ minutes}$

Edition: Epson SureColor F-series +

Wasatch SoftRip

Times are based on a SEFA Sublimax heat press.

*Differences are possible, dependent the printer, inks, heatpress, etc...
